

# CSI COMMONLY USED PASSWORDS

Cyber Security Awareness Program - "Your users are your WEAKEST link", FBI

**Certified Cyber Security Experts**

- |                |                |
|----------------|----------------|
| 1. 123456      | 14. 111111     |
| 2. password    | 15. 1qaz2wsx   |
| 3. 12345678    | 16. dragon     |
| 4. qwerty      | 17. master     |
| 5. 12345       | 18. monkey     |
| 6. 123456789   | 19. letmein    |
| 7. football    | 20. login      |
| 8. 1234        | 21. princess   |
| 9. 1234567     | 22. qwertyuiop |
| 10. baseball   | 23. solo       |
| 11. welcome    | 24. Passw0rd   |
| 12. 1234567890 | 25. starwars   |
| 13. abc123     |                |

*A good password should be at least eight characters long. It should include a combination of alphabets in lower and upper case (like A, a), digits (0-9) and special characters (like @, \$). A password should never contain account name, username, birthday or similar important date, phone number etc. Also, never repeat a password on different accounts.*

## Our Value

- Certified in Privacy and Security (CISP, HCISP)
- Extensive Cyber Security consulting experience
- Combined 200+ years of consulting in IT
- Knowledge of Laws and Policies
- 24/7 Support
